RE: Status of Permit, Small Fry Mine, ACT/037/022, San Juan County, Utah

I spoke with Colleen Kelley, Environmental Supervisor, at Hecla on February 19, 1985 RE: the status of the Small Fry Mine. She said they are working on the annual report and will submit the current status of the operation. The operation has been idle since 1978. (According to Rule M-7[3], the Division "upon receipt of notification of termination or extended suspension shall within 30 days cause inspection to be made of the property and take whatever action may be appropriate in furtherance of the purposes of the Act.") - *oh well!?!?!?*

There is a large ore stockpile that comprises the largest part of the disturbance. They are trying to sell this stockpile. This operation is covered by a reclamation contract between the Board and Ranchers. This will need to be revised because of the change of ownership.

They may do reclamation work this summer.
